

City University of Hong Kong

Information on a Course offered by the Department of Information Systems with effect from Semester B in 2013 / 2014

Part I

Course Title:	<u>Management of Global Technology Business Services</u>
Course Code:	<u>IS3000</u>
Course Duration:	<u>One Semester</u>
No. of Credit Units:	<u>3</u>
Level:	<u>B3</u>
Medium of Instruction:	<u>English</u>
Prerequisites: (Course Code and Title)	<u>Nil</u>
Precursors: (Course Code and Title)	<u>Nil</u>
Equivalent Courses: (Course Code and Title)	<u>Nil</u>
Exclusive Courses: (Course Code and Title)	<u>Nil</u>

Part II

1. Course Aims:

This course aims to

Prepare students for future career in organizations where a significant part of the operations are carried out virtually without the physical presence at all. Therefore,

- Students will be able to understand the design principles of global virtual work.
- Students will be able to set up a virtual organization by comparing the benefits and difficulties of creating virtual work environments, selecting hardware and software applicants, planning to reorganize the global flows of information, resource, peoples, teamwork, product and service.

2. Course Intended Learning Outcomes (CILOs)

Upon successful completion of this course, students should be able to:

No.	CILOs	Weighting (if applicable)	DEC Dimensions (Ability/Attitude/ Accomplishment)
1.	Explain the evolution of virtual organization and virtual community, and how IT enables such evolution	2	
2.	Demonstrate the attitude and ability to discover the virtual organization by assessing and addressing the driving factors to the transformation	2	Attitude and ability
3.	Demonstrate the attitude and ability to discover the best practices of making strategically use of virtual event, virtual game, virtual teamwork, crowdsourcing and collective wisdom	2	Attitude and ability
4.	Explain the social, economic, regulatory, political, and ethical aspects in the development, implementation, and use of Internet services in a virtual working environment	2	
5.	Work productively as part of a team to complete project tasks in a collaborative virtual working environment	3	Ability and accomplishment

3. Teaching and Learning Activities (TLAs)

(Designed to facilitate students' achievement of the CILOs)

Indicative of likely activities and tasks students will undertake to learn in this course. Detail will be provided to students in the first week of the attendance in this course.

TLA1: Lecture

The following concepts of virtual work and virtual organizations are explained:

- virtual organization principles
- virtual organization strategy
- virtual organization implementation
- virtual community
- virtual teamwork
- virtual game
- virtual event
- crowdsourcing
- collective wisdom
- technologies enabling virtual community, teamwork and virtual organization
- knowledge management in diversified working sections

TLA2: Virtual class – virtual teamwork

A mission will be given to the virtual teams to accomplish within 120 minutes, and each team has to be reported their findings through the virtual class platform. The class will be video recorded.

TLA3: Practical exercises – virtual cooperation

Students are required to

- attend a virtual tour at a virtual university and perform some tasks
- evaluate and propose existing and emerging technologies to support their virtual cooperation
- arrange the coordination between different involved parties of their virtual cooperation

TLA4: Practical exercises – in-class and off-class participation

In addition to in-class small group discussions and participation, collaborative technologies (such as wiki, blog, and online collaboration tools) will be used for new discussions as well as the continuance of the in-class discussions.

ILO No	TLA1	TLA2	TLA3	TLA4	Hours/week (if applicable)
CILO 1	2	1	1	1	---
CILO 2	2	1	1	1	---
CILO 3	2	1	2	1	---
CILO 4	1	1	1	1	---
CILO 5		2	1	1	---

(1: Minor focus on the ILO; 2: Main focus on the ILO)

4. Assessment Tasks/Activities

(Designed to assess how well the students achieve the CILOs)

Indicative of likely activities and tasks students will undertake to learn in this course. Final details will be provided to students in their first week of attendance in this course.

AT1: Participation (20%):

Two components:

- In-class: small group discussions, self reflection, raise and answer questions, etc. are used to assess students' understanding of topics and their abilities to apply their skills.
- Off-class: discussions of current virtual organization issues (such as emerging technologies and new policies) with collaborative technologies (such as wiki, social network, Google apps and blog)

AT2: Group Project – Crowdsourcing (35%):

A group project, which includes a project report and presentation, will be allocated to let students make use of the idea of crowdsourcing or collective wisdom.

AT3: Screencast competition – in group (10%):

A short video on a given topic will be allocated to let students to gain some screencast and research experience.

AT4: Final Examination (35%, one 2-hour exam):

A written examination is developed to assess students' competence level of the taught subjects.

** Students must pass BOTH coursework and examination in order to get an overall pass in this course. **

ILO No	AT1 (20%)	AT2 (35%)	AT3 (10%)	AT4 (35%)
CILO 1	1	1	2	2
CILO 2	1	2	2	2
CILO 3	1	2	2	2
CILO 4	1	2	2	1
CILO 5		2	2	

(1: Minor focus on the ILO; 2: Main focus on the ILO)

5. Grading of Student Achievement: Refer to Grading of Courses in the Academic Regulations.

Grading pattern: Standard (A+, A, A- ... C-, D, F)

Part III**Keyword Syllabus:**

Virtual communities; Virtuality; Virtual events; Virtual game; Virtual class; Global virtual team in virtual organizations; Crowdsourcing; Collaborative wisdom.

Recommended Reading:

No text book is required.

Articles will be recommended to students. E.g.

Hill, E. Ferris, M. & Martinson, V., 2003, Does it matter where you work? a comparison of how three work venues (traditional office, virtual office, and home office) influences aspects of work and personal/family life, Journal of Vocational Behavior, 63(2), pp. 220-241.

Foster, I., 2001, The anatomy of the grid: enabling scalable virtual organizations, International Journal of High Performance Computing Application, 15 (3), pp. 200-222.

Markus, M. Manville, B., Agres, C., 2000, What makes a virtual organization work, Sloan Management Review, 42, pp. 13-26.
