

City University of Hong Kong

Information on a Course offered by Department of Information Systems and Department of Management with effect from Semester A in 2014/2015.

Part I

Course Title: Global Technology Business Ventures

Course Code: IS4040

Course Duration: One Semester (13 weeks)

No. of Credit Units: 3

Level: B4

Medium of Instruction: English

Prerequisites: (Course Code and Title) CB4303

Precursors: (Course Code and Title) Nil

Equivalent Courses: (Course Code and Title) Nil

Exclusive Courses: (Course Code and Title) Nil

Part II

1. Course Aims:

This course aims to:

This course will equip students with in-depth knowledge of global Technology Business (TechBiz) ventures, including business models, innovations with disruptive information technologies, business plans, intellectual property management, and execution of business models to the success. Global TechBiz ventures (e.g. Baidu, Alibaba, Tencent, Facebook, Google etc.) in Hong Kong and the mainland China will be the main focus of this course, they usually make use of disruptive information technologies, e.g. social, mobile, big data analytics and cloud services, for business innovations and can create great wealth for investors and the society.

2. Course Intended Learning Outcomes (CILOs)

Upon successful completion of this course, students should be able to:

No.	CILOs	Weighting (if applicable)	DEC Dimensions (Attitude/ Ability/ Accomplishments)
1.	Explain the fundamentals of global TechBiz ventures, e.g. disruptive information technologies, business opportunities, venture types and organization structures.	1	Attitude and ability
2.	Describe the competitive and innovation technologies, intellectual properties, risks and returns for the global TechBiz ventures.	3	Attitude and ability
3.	Demonstrate the ability to design business models, business plan, and sales and marketing plan for a global TechBiz venture.	3	Ability and accomplishment
4.	Demonstrate good communication and interpersonal skills in presenting innovative global business solutions.	2	Ability

(3: Relatively most focused ILOs; 2: moderately focused ILOs; 1: less focused ILOs)

3. Teaching and learning Activities (TLAs)

(designed to facilitate students' achievement of the CILOs)

Teaching and Learning Activities (TLAs)	CILO No.	Hours/week (if applicable)
TLA1: Lecture	1,2,3	26 hours
TLA2: Tutorial	1,2,3,4	13 hours

TLA1: Lecture

Concepts and general knowledge of global business are explained.

- In-class discussion: Students are expected to participate in discussions during lectures (e.g. face-to-face discussion, possibly using mobile devices) with the lecturer providing feedback based on students' responses.

TLA2: Tutorial

The tutorial covers various aspects of global TechBiz ventures (e.g. Tencent which is listed in Hong Kong stock exchange market) and group project discussions.

- Global TechBiz cases: Students will be given real-life business cases on global TechBiz that relate to the daily life, e.g. use of WeChat for mobile e-Commerce and mobile payment processes;
- Group project discussion: The group project will involve applying innovative business models, business plans, and sales and marketing plans with the use of disruptive information technologies for global business innovations.

4. Assessment Tasks/Activities

(Designed to assess how well the students achieve the CILOs)

Assessment Tasks/Activities (ATs)	CILO No.	Weighting (if applicable)	Remarks
AT1: In-class Participation	1,2,3,4	10%	
AT2: Group Project	1,2,3,4	40%	
AT3: Final Exam	1,2,3	50%	

** Students are required to pass both coursework (including group project and in-class participation) and examination in order to secure an overall pass in this course.

AT1: In-class Participation (10%)

20% is given for student's participation in terms of quality of questions, answers and student engagement in both lectures and tutorials throughout the semester.

AT2: Group Project (40%)

The project is divided into 2 phases.

- Phase 1 (20%) is to test students' ability to identify problems and design global business models for elevating revenue and performance of a selected global TechBiz venture;
- Phase 2 (20%) is to test students' ability in applying the concepts and theories to design innovative global business solutions, so as to implement the global business models in Phase 1.

AT3: Final Exam (50%, one 2-hour exam)

The examination is designed to gauge the student's grasp of global business venture concepts and knowledge, as well as the ability to apply them to solve global business problems in various situations.

5. Grading of Student Achievement: Refer to Grading of Courses in the Academic Regulations.

The grading of student achievement is based on student performance in assessment tasks/activities with the following rubrics. Students will be graded by (A+, A, A- ... F).

ILO	Excellent	Good	Adequate	Marginal
CILO1	Demonstrate the ability to explain all fundamentals of global TechBiz ventures and critically analyze how disruptive IT transform, and innovate the traditional global business context	Demonstrate the ability to explain most fundamentals of global TechBiz ventures and critically analyze how disruptive IT transform, and innovate the traditional global business context	Demonstrate the ability to explain major fundamentals of global TechBiz ventures and critically analyze how disruptive IT transform, and innovate the traditional global business context	Demonstrate the ability to explain some fundamentals of global TechBiz ventures and critically analyze how disruptive IT transform, and innovate the traditional global business context

CILO2	Demonstrate the ability to accurately describe all global business models in connection with the fastest growing global TechBiz ventures in today's business world; demonstrate a profound understanding of related global business case studies	Demonstrate the ability to accurately describe all global business models in connection with the fastest growing global TechBiz ventures in today's business world; demonstrate a great understanding of related global business case studies	Demonstrate the ability to accurately describe most global business models in connection with the fastest growing global TechBiz ventures in today's business world; demonstrate a reasonable understanding of related global business case studies	Demonstrate the ability to accurately describe some global business models in connection with the fastest growing global TechBiz ventures in today's business world; demonstrate a minimal understanding of related global business case studies
CILO3	Demonstrate the ability to identify global business problems and then design and develop innovative global business solutions that can provide complete solutions to global TechBiz ventures	Demonstrate the ability to identify global business problems and then design and develop rigorous global business solutions that can provide mostly complete solutions to global TechBiz ventures	Demonstrate the ability to identify global business problems and then design and develop practical global business solutions that can provide so what complete solutions to global TechBiz ventures	Demonstrate the ability to identify global business problems and then design and develop practical global business solutions that can provide solutions with limited impact on global TechBiz ventures
CILO4	Demonstrate the cogent ability to perform all required team work, and effectively communicate and present information in all relevant contexts of the proposed innovative global business solutions	Demonstrate the ability to perform most required team work, and effectively communicate and present information in most relevant contexts of the proposed innovative global business solutions	Demonstrate the ability to perform some required team work, and effectively communicate and present information in some relevant contexts of the proposed innovative global business solutions	Demonstrate the ability to perform a little required team work, and communicate and present information in a few contexts of the proposed innovative global business solutions

Part III

Keyword Syllabus:

1. The TechBiz and challenges
 - The TechBiz venture and the challenges, venture capital and the value of a TechBiz venture, dynamic capitalism and creative destruction
2. Opportunity and the business environment
 - Trends, convergence and opportunities created by disruptive information technologies, evaluating the opportunity, the decision to act or continue looking elsewhere, the new TechBiz venture stories like Tencent, Facebook
3. Building a competitive advantage
 - The vision, mission statement, value proposition, business model innovation in challenging markets, core competencies of TechBiz ventures, e.g. WhatsApp
4. Innovation technologies
 - Types of innovations, business innovations with disruptive information technologies, e.g. social networks, mobile applications, big data analytics and cloud services, strengths and opportunities –SWOT analysis, matching tactics to markets
5. TechBiz ventures and business plan
 - New TechBiz ventures, the business plan, risk and uncertainty, scale and scope, finding disruptive applications

6. Intellectual property management
 - Company name, legal form of the TechBiz venture, intellectual property, trade secrets, patents, trademarks, copyrights, and licensing
7. The global TechBiz venture organization
 - The new venture team, organizational design, leadership, emotional intelligence, organizational culture, social capital, attracting and retaining talents in global TechBiz ventures
8. Acquisitions, mergers and global business
 - Global TechBiz ventures, acquisitions and mergers for synergy and high growth, vertical integration and outsourcing, innovation and virtual organizations, acquiring TechBiz and knowledge
9. Profit and harvest plan
 - The revenue model, the profit model, managing revenue growth, the harvest plan, exit and failure
10. Sources of capital
 - Financing the new TechBiz venture, venture investments, sources of capital, bootstrap and seed financing, angels, venture capital, corporate venture capital, valuation, teams of the Deal, IPO
11. Leading a new TechBiz venture to success
 - New venture story, critical success factors for the business plan, execution of the business plan, the adaptive global TechBiz venture, e.g. Google
